

**SEX BY AGE BY EDUCATIONAL ATTAINMENT FOR THE POPULATION 18 YEARS AND OVER**  
**Universe: Population 18 years and over**  
**2016 American Community Survey 1-Year Estimates**

Tell us what you think. [Provide feedback to help make American Community Survey data more useful for you.](#)

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

1 83 of 83	Alaska	
	Estimate	Margin of Error
Total:	554,598	+/-588
Male:	291,298	+/-1,697
18 to 24 years:	43,948	+/-1,391
Less than 9th grade	478	+/-308
9th to 12th grade, no diploma	6,312	+/-1,163
High school graduate (includes equivalency)	18,445	+/-1,748
Some college, no degree	15,138	+/-1,629
Associate's degree	1,272	+/-552
Bachelor's degree	2,138	+/-825
Graduate or professional degree	165	+/-197
25 to 34 years:	63,053	+/-1,573
Less than 9th grade	606	+/-515
9th to 12th grade, no diploma	3,571	+/-767
High school graduate (includes equivalency)	21,319	+/-1,993
Some college, no degree	19,029	+/-2,199
Associate's degree	5,192	+/-1,115
Bachelor's degree	11,078	+/-1,621
Graduate or professional degree	2,258	+/-577
35 to 44 years:	46,715	+/-1,806
Less than 9th grade	969	+/-591
9th to 12th grade, no diploma	2,108	+/-697
High school graduate (includes equivalency)	15,401	+/-2,170
Some college, no degree	13,126	+/-1,623
Associate's degree	2,947	+/-745
Bachelor's degree	7,071	+/-1,149
Graduate or professional degree	5,093	+/-1,042
45 to 64 years:	99,845	+/-2,110
Less than 9th grade	2,068	+/-728
9th to 12th grade, no diploma	4,949	+/-888
High school graduate (includes equivalency)	30,482	+/-2,341
Some college, no degree	26,217	+/-2,477
Associate's degree	10,205	+/-2,129
Bachelor's degree	14,407	+/-1,697
Graduate or professional degree	11,517	+/-1,572
65 years and over:	37,737	+/-685
Less than 9th grade	1,416	+/-399
9th to 12th grade, no diploma	1,773	+/-594
High school graduate (includes equivalency)	8,344	+/-1,098
Some college, no degree	11,136	+/-1,099
Associate's degree	2,207	+/-631
Bachelor's degree	6,314	+/-1,159
Graduate or professional degree	6,547	+/-1,024
Female:	263,300	+/-1,698
18 to 24 years:	31,699	+/-1,309
Less than 9th grade	236	+/-185
9th to 12th grade, no diploma	3,527	+/-852
High school graduate (includes equivalency)	11,273	+/-1,255
Some college, no degree	11,626	+/-1,329
Associate's degree	1,740	+/-688
Bachelor's degree	2,869	+/-744
Graduate or professional degree	428	+/-464
25 to 34 years:	58,576	+/-2,009
Less than 9th grade	376	+/-218
9th to 12th grade, no diploma	2,871	+/-985

**Explanation of Symbols:**

An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2016 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
