

**POVERTY STATUS IN THE PAST 12 MONTHS OF FAMILIES BY FAMILY TYPE BY PRESENCE OF RELATED CHILDREN UNDER 18 YEARS BY AGE OF RELATED CHILDREN (AMERICAN INDIAN AND ALASKA NATIVE ALONE)**  
**Universe: Families with a householder who is American Indian and Alaska Native alone**  
**2016 American Community Survey 1-Year Estimates**

Tell us what you think. [Provide feedback to help make American Community Survey data more useful for you.](#)

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

	Alaska	
	Estimate	Margin of Error
Total:	21,312	+/-1,574
Income in the past 12 months below poverty level:	4,465	+/-618
Married-couple family:	1,201	+/-233
With related children of the householder under 18 years:	1,000	+/-208
Under 5 years only	36	+/-30
Under 5 years and 5 to 17 years	534	+/-166
5 to 17 years only	430	+/-132
No related children of the householder under 18 years	201	+/-106
Other family:	3,264	+/-586
Male householder, no wife present:	935	+/-229
With related children of the householder under 18 years:	787	+/-207
Under 5 years only	290	+/-162
Under 5 years and 5 to 17 years	238	+/-112
5 to 17 years only	259	+/-84
No related children of the householder under 18 years	148	+/-63
Female householder, no husband present:	2,329	+/-568
With related children of the householder under 18 years:	2,108	+/-563
Under 5 years only	207	+/-123
Under 5 years and 5 to 17 years	1,467	+/-516
5 to 17 years only	434	+/-190
No related children of the householder under 18 years	221	+/-127
Income in the past 12 months at or above poverty level:	16,847	+/-1,526
Married-couple family:	9,881	+/-1,309
With related children of the householder under 18 years:	5,785	+/-981
Under 5 years only	672	+/-294
Under 5 years and 5 to 17 years	1,975	+/-489
5 to 17 years only	3,138	+/-738
No related children of the householder under 18 years	4,096	+/-904
Other family:	6,966	+/-953
Male householder, no wife present:	2,409	+/-453
With related children of the householder under 18 years:	1,310	+/-470
Under 5 years only	174	+/-96
Under 5 years and 5 to 17 years	233	+/-117
5 to 17 years only	903	+/-447
No related children of the householder under 18 years	1,099	+/-318
Female householder, no husband present:	4,557	+/-803
With related children of the householder under 18 years:	2,861	+/-616
Under 5 years only	552	+/-211
Under 5 years and 5 to 17 years	748	+/-351
5 to 17 years only	1,561	+/-480
No related children of the householder under 18 years	1,696	+/-466

Explanation of Symbols:

An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-.' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+.' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2016 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
