Footnote(s)

- 1 The reference period for income data from a given census is the calendar year prior to the specified census year.

Specifically, income data from the 2006 and 2016 censuses relate to the calendar year prior to the census year, i.e., 2005 and 2015 respectively. For additional information, refer to the Dictionary, Census of Population, 2016 and the Income Reference Guide, Census of Population, 2016.
- 2 The reference period for income data from a given census is the calendar year prior to the specified census year.

Specifically, income data from the 2006 and 2016 censuses relate to the calendar year prior to the census year, i.e., 2005 and 2015 respectively. For additional information, refer to the Dictionary, Census of Population, 2016 and the Income Reference Guide, Census of Population, 2016.
- 3 Median income - The median income of a specified group is the amount that divides the income distribution of that group into two halves, i.e., the incomes of half of the units in that group are below the median, while those of the other half are above the median. Median incomes of families are calculated for all units, whether or not they had income.

Data quality note(s) – Nunavut

- **Incomplete enumeration flag**
Default. Not applicable.
- **Short-form data quality flag**
Global non-response rate (GNR), short-form census questionnaire: 7.9%.
- **Short-form income data quality flag**
Data quality index showing a short-form income non-response rate higher than or equal to 10%, but lower than 20%.
