

## Data tables, 2016 Census

### Household Income Statistics (3) and Household Type Including Census Family Structure (11) for Private Households of Canada, Provinces and Territories, Census Divisions and Census Subdivisions, 2016 Census - 100% Data

#### Data table

Yukon			
Household type including census family structure (11)	Household income statistics (3)		
	Total - Household income statistics <sup>1</sup>	Median total income of households (\$)	Median after-tax income of households (\$)
Total - Household type including census family structure <sup>2</sup>	15,215	84,521	73,935
Census family households	9,595	112,539	97,544
One-census-family households without additional persons	8,635	109,395	95,121
One couple census family without other persons in the household	7,165	120,710	104,274
Without children	3,725	105,045	91,414
With children	3,440	137,574	118,067
One lone-parent census family without other persons in the household	1,470	61,696	57,454
With a male lone parent	375	67,904	61,280
With a female lone parent	1,100	59,627	56,288
Other census family households <sup>3</sup>	960	137,045	120,747
Non-census-family households	5,620	46,651	42,416

#### Footnote(s)

1 Total income - The sum of certain incomes (in cash and, in some circumstances, in kind) of the statistical unit during a specified reference period. The components used to calculate total income vary between:

- statistical units of social statistical programs such as persons, private households, census families and economic families;
- statistical units of business statistical programs such as enterprises, companies, establishments and locations;
- statistical units of farm statistical programs such as farm operator and farm family.

In the context of persons, total income refers to receipts from certain sources, before income taxes and deductions, during a specified reference period.

In the context of census families, total income refers to receipts from certain sources of all of its family members, before income taxes and deductions, during a specified reference period.

In the context of economic families, total income refers to receipts from certain sources of all of its family members, before income taxes and deductions, during a specified reference period.

In the context of households, total income refers to receipts from certain sources of all household members, before income taxes and deductions, during a specified reference period.

The monetary receipts included are those that tend to be of a regular and recurring nature. Receipts that are included as income are:

- employment income from wages, salaries, tips, commissions and net income from self-employment (for both unincorporated farm and non-farm activities);
- income from investment sources, such as dividends and interest on bonds, accounts, guaranteed investment certificates (GICs) and mutual funds;
- income from employer and personal pension sources, such as private pensions and payments from annuities and registered retirement income funds (RRIFs);
- other regular cash income, such as child support payments received, spousal support payments (alimony) received and scholarships;
- income from government sources, such as social assistance, child benefits, Employment Insurance benefits, Old Age Security benefits, Canada Pension Plan and Québec Pension Plan benefits and disability income.

Receipts excluded from this income definition are:

- one-time receipts, such as lottery winnings, gambling winnings, cash inheritances, lump-sum insurance settlements and tax-free savings account (TFSA) or registered retirement savings plan (RRSP) withdrawals;
- capital gains because they are not by their nature regular and recurring. It is further assumed that they are more relevant to the concept of wealth than the concept of income;
- employers' contributions to registered pension plans, Canada Pension Plan, Québec Pension Plan and Employment Insurance;
- voluntary inter-household transfers, imputed rent, goods and services produced for barter and goods produced for own consumption.

After-tax income - Total income less income taxes of the statistical unit during a specified reference period. Income taxes refers to the sum of federal income taxes, provincial and territorial income taxes, less abatement where applicable.

Provincial and territorial income taxes include health care premiums in certain jurisdictions. Abatement reduces the federal income taxes payable by persons residing in Quebec or in certain self-governing Yukon First Nation settlement lands.

For the 2016 Census, the reference period is the calendar year 2015 for all income variables.

Median income - The median income of a specified group is the amount that divides the income distribution of that group into two halves, i.e., the incomes of half of the units in that group are below the median, while those of the other half are above the median. Median incomes of households are calculated for all units, whether or not they had income.

2 For more information, refer to the Census Dictionary: Household type; Census family.

3 One-census-family households with additional persons and multiple-census-family households.

## Data quality note(s) – Yukon

- **Incomplete enumeration flag**

Default. Not applicable.

- **Short-form data quality flag**

Global non-response rate (GNR), short-form census questionnaire: 6.7%.

- **Short-form income data quality flag**

Data quality index showing a short-form income non-response rate higher than or equal to 10%, but lower than 20%.
