

## Degree of urbanisation by Area, Year and Population and degree of urbanisation

	Population, total	Population in densely populated areas	2016 Population in sparsely populated areas	Population in other areas	Degree of urbanisation, %
North Ostrobothnia	411150	340043	68226	2881	83,3
Kainuu	74803	54855	19298	650	74,0
Lapland	180207	137549	40071	2587	77,4

The statistics use the regional division of 1 January 2017.

Population and degree of urbanisation:

Population in densely populated areas:

All clusters of buildings with at least 200 inhabitants where the distance between buildings does not exceed 200 metres are defined as localities or urban settlements. In defining localities, not only residential but also business, office and other buildings used as workplaces are taken into account. Administrative regional divisions do not have an effect on the formation of localities.

Population and degree of urbanisation: Population in other areas: No coordinates

Population and degree of urbanisation: Degree of urbanisation, %: Degree of urbanisation refers to the proportion of people living in localities or urban settlements among the population of a municipality whose place of residence can be defined by
