\* The persistent at-risk-of-poverty (PAROP) rate shows the percentage of the population living in households where the equivalised disposable income was below the at-risk-of-poverty threshold for the current year and at least two out of the preceding three years. The definition of persistent at-risk-of-poverty is the same that is used by Eurostat.

\* Number of persons refer to the persons in the longitudinell population and is the denominator in the calculations of the at-risk-of-poverty rate and the persistent at-risk-of-poverty rate. In order to be included in the populatioen a person has to be registered in the national population register for each of the years during the period of measurement.

\* For persons who are residents in Sweden but working in another country income from work is in large parts missing. This is of relative importance in some border municipalities where commuting to other Nordic countries are quite common.
