70 Generation status refers to whether or not the person or the person's parents were born in Canada.

For more information on generation status variables, including information on their classifications, the questions from which they are derived, data quality and their comparability with other sources of data, please refer to the Place of Birth, Generation Status, Citizenship and Immigration Reference Guide, Census of Population, 2016.

71 'First generation' includes persons who were born outside Canada. For the most part, these are people who are now, or once were, immigrants to Canada.

'Applicant type' refers to whether an immigrant was identified as the principal applicant, the spouse or the dependant on the application for permanent residence.

'Immigrant' refers to a person who is, or who has ever been, a landed immigrant or permanent resident. Such a person has been granted the right to live in Canada permanently by immigration authorities. Immigrants who have obtained Canadian citizenship by naturalization are included in this group. In the 2016 Census of Population, data on admission category and applicant type are available for immigrants who landed in Canada between January 1, 1980 and May 10, 2016.

For more information on immigration variables, including information on their classifications, data quality and their comparability with other sources of data, please refer to the Place of Birth, Generation Status, Citizenship and Immigration Reference Guide, Census of Population, 2016.

75 'Economic immigrants' includes immigrants who have been selected for their ability to contribute to Canada's economy through their ability to meet labour market needs, to own and manage or to build a business, to make a substantial investment, to create their own employment or to meet specific provincial or territorial labour market needs.

76 'Principal applicants' includes immigrants who were identified as the principal applicant on the application for permanent residence.

78 'Immigrants sponsored by family' includes immigrants who were sponsored by a Canadian citizen or permanent resident and were granted permanent resident status on the basis of their relationship either as the spouse, partner, parent, grand-parent, child or other relative of this sponsor. The terms 'family class' or 'family reunification' are sometimes used to refer to this category.

79 'Refugees' includes immigrants who were granted permanent resident status on the basis of a well-founded fear of returning to their home country. This category includes persons who had a well-founded fear of persecution for reasons of race, religion, nationality, membership in particular social group or for political opinion (Geneva Convention refugees) as well as persons who had been seriously and personally affected by civil war or armed conflict, or have suffered a massive violation of human rights. Some refugees were in Canada when they applied for refugee protection for themselves and their family members (either with them in Canada or abroad). Others were abroad and were referred for resettlement to Canada by the United Nations Refugee Agency, another designated referral organization or private sponsors.

80 'Other immigrants' includes immigrants who were granted permanent resident status under a program that does not fall under the economic immigrants, the immigrants sponsored by family or the refugee categories.

81 Visible minority refers to whether a person belongs to a visible minority group as defined by the Employment Equity Act and, if so, the visible minority group to which the person belongs. The Employment Equity Act defines visible minorities as 'persons, other than Aboriginal peoples, who are non-Caucasian in race or non-white in colour.' The visible minority population consists mainly of the following groups: South Asian, Chinese, Black, Filipino, Latin American, Arab, Southeast Asian, West Asian, Korean and Japanese.

For more information on the Visible minority variable, including information on its classification, the questions from which it is derived, data quality and its comparability with other sources of data, please refer to the Visible Minority and Population Group Reference Guide, Census of Population, 2016.

88 Includes persons who reported 'Yes' to the Aboriginal group question (Question 18), as well as persons who were not considered to be members of a visible minority group.

89 This is a total population estimate. The sum of the ethnic groups in this table is greater than the total population estimate because a person may report more than one ethnic origin in the census.

'Ethnic origin' refers to the ethnic or cultural origins of the person's ancestors. An ancestor is usually more distant than a grandparent. For additional information on the collection and dissemination of ethnic origin data, refer to the Ethnic Origin Reference Guide, Census of Population, 2016.

116 Highest certificate, diploma or degree is the classification used in the census to measure the broader concept of 'Educational attainment.'

This variable refers to the highest level of education that a person has successfully completed and is derived from the educational qualifications questions, which asked for all certificates, diplomas and degrees to be reported.

The general hierarchy used in deriving this variable (high school, trades, college, university) is loosely tied to the 'in-class' duration of the various types of education. At the detailed level, someone who has completed one type of certificate, diploma or degree will not necessarily have completed the credentials listed below it in the hierarchy. For example, a person with an apprenticeship or trades certificate or diploma may not have completed a high school certificate or diploma, nor does an individual with a 'master's degree' necessarily have a 'certificate or diploma above bachelor level.' Although the hierarchy may not fit all programs perfectly, it gives a general measure of educational attainment.

This variable is reported for persons aged 15 years and over in private households.

Users are advised to consult data quality comments for 'Highest certificate, diploma or degree', available in the Education Reference Guide, Census of Population, 2016, Catalogue no. 98-500-X2016013.

117 'Secondary (high) school diploma or equivalency certificate' includes only people who have this as their highest educational qualification. It excludes persons with a postsecondary certificate, diploma or degree.

118 'Trades certificate or diploma other than Certificate of Apprenticeship or Certificate of Qualification' includes trades certificates or diplomas such as pre-employment or vocational certificates and diplomas from brief trade programs completed at community colleges, institutes of technology, vocational centres and similar institutions.

119 'Certificate of Apprenticeship or Certificate of Qualification' also includes Journeyperson's designations.

120 'Earned doctorate' refers to persons who have completed a doctorate degree awarded by a university. This includes, for example, Doctor of Philosophy (Ph.D.) and Doctor of Juridical Science (S.J.D.). It does not include honorary doctorates.

121 'Field of study' refers to the discipline or area of learning/training associated with a particular course or programme of study.

This variable refers to the predominant discipline or area of learning or training of a person's highest completed postsecondary certificate, diploma or degree, classified according to the Classification of Instructional Programs (CIP) Canada 2016.

This 'Major field of study' variable can be used either independently or in conjunction with the 'Highest certificate, diploma or degree' variable. When the latter is used with 'Major field of study,' it should be noted that different fields of study will be more common for different types of postsecondary qualifications. At the detailed program level, some programs are only offered by certain types of institutions.

There was an explicit instruction in the questionnaire which instructed respondents to be as specific as possible in indicating a subfield or subcategory of specialization within a broad discipline or area of training.

This variable is reported for persons aged 15 years and over in private households.

This variable shows the 'Variant of CIP 2016 - Alternative primary groupings' CIP variant, with the hierarchy of the primary groupings and two-digit series. When a primary grouping contains more than one subseries from series '30. Multidisciplinary/interdisciplinary studies,' these subseries are grouped together. An exception is made for '30.01 Biological and physical sciences' due to its large size. For more information on the CIP classification, see the Classification of Instructional Programs, Canada 2016: <http://www.statcan.gc.ca/eng/concepts/classification>.

For information on collection, classification and data quality for this variable, refer to the Education Reference Guide, Census of Population, 2016, Catalogue no. 98-500-X2016013.

Certain series and their subcomponents are not used when coding major field of study for the census. These are series 21, 32 to 37 and 53, which represent non-credit and personal improvement fields of study.

122 'No postsecondary certificate, diploma or degree' includes persons who have not completed an apprenticeship or trades certificate or diploma; a college, CEGEP or other non-university certificate or diploma; or a university certificate, diploma or degree.

123 'Interdisciplinary humanities' includes '30.13 Medieval and renaissance studies,' '30.21 Holocaust and related studies,' '30.22 Classical and ancient studies' and '30.29 Maritime studies.'

125 'Other interdisciplinary physical and life sciences' includes '30.18 Natural sciences,' '30.19 Nutrition sciences,' '30.27 Human biology' and '30.32 Marine sciences.'

126 'Interdisciplinary mathematics, computer and information sciences' includes '30.06 Systems science and theory,' '30.08 Mathematics and computer science' and '30.30 Computational science.'

127 'Location of study' refers to either:

- the province, territory or country of the institution from which a person obtained a certificate, diploma or degree, or;
- the province, territory or country of the institution that a person attended during a specified reference period, or for a specific level of education.

In both cases, location of study refers to the location of the institution granting the certificate, diploma or degree, not the location of the person at the time he or she obtained the qualification or was attending the institution. The geographic location is specified according to boundaries current at the time the data are collected, not the boundaries at the time of study.

This is a summary variable that indicates whether the 'Location of study' of the person's highest certificate, diploma or degree was the same province or territory where the person lived at the time of the 2016 Census of Population, a different Canadian province or territory, or outside Canada. This variable is derived from 'Location of study' and 'Province or territory of current residence.' It only applies to individuals who had completed a postsecondary certificate, diploma or degree.

'Location of study outside Canada' may be further sub-classified using the Standard Classification of Countries and Areas of Interest (SCCAI). When using the SCCAI for this sub-classification, the class 'Canada' is not used.

This variable is reported for persons aged 15 years and over in private households.

For information on collection, classification and data quality for 'Location of study compared with province or territory of residence,' refer to the Education Reference Guide, Census of Population, 2016, Catalogue no. 98-500-X2016013.

128 'Postsecondary certificate, diploma or degree' includes 'apprenticeship or trades certificate or diploma,' 'college, CEGEP or other non-university certificate or diploma' and university certificates, diplomas and degrees.

129 Refers to all locations of study outside Canada, including the six locations outside Canada most often reported at the national level. These will not necessarily be the top six countries for other geographies.

130 The official name of United States is United States of America.

131 The official name of United Kingdom is United Kingdom of Great Britain and Northern Ireland. United Kingdom includes Scotland, Wales, England and Northern Ireland (excludes Isle of Man, the Channel Islands and British Overseas Territories).

132 China excludes Hong Kong and Macao.

133 Refers to whether a person aged 15 years and over was employed, unemployed or not in the labour force during the week of Sunday, May 1 to Saturday, May 7, 2016.

Early enumeration was conducted in remote, isolated parts of the provinces and territories. When enumeration has taken place before May 2016, the reference date used is the date on which the household was enumerated.

In the past, this variable was called Labour force activity.

134 Refers to the number of weeks in which a person aged 15 years and over worked for pay or in self-employment in 2015 at all jobs held, even if only for a few hours, and whether these weeks were mostly full time (30 hours or more per week) or mostly part time (less than 30 hours per week).

135 Includes persons aged 15 years and over who never worked, persons who worked prior to 2015 and persons who worked in 2016, but not in 2015.

136 Includes persons aged 15 years and over who worked full year (49 weeks and over) and mostly full time (30 hours or more per week) in 2015.

137 Includes persons aged 15 years and over who worked full year mostly part time or part year mostly full time or part year mostly part time in 2015. Part year is less than 49 weeks and part time is less than 30 hours per week.

138 Refers to the kind of work performed by persons aged 15 years and over as determined by their kind of work and the description of the main activities in their job. The occupation data are produced according to the NOC 2016.

139 Refers to the general nature of the business carried out in the establishment where the person worked.

140 The code and title of this category are not found in the North American Classification System (NAICS) 2012; this category is needed due to the combination of NAICS sub-sectors performed during the coding process.

141 Classification of respondents according to whether they worked at home, worked outside Canada, had no fixed workplace address or worked at a specific address (usual place of work).

- 142 Language used most often at work refers to the language the person uses most often at work. A person can report more than one language as 'used most often at work' if the languages are used equally often.
- For more information on language variables, including information on their classifications, the questions from which they are derived, data quality and their comparability with other sources of data, please refer to the Languages Reference Guide, Census of Population, 2016.
- 143 Other language(s) used regularly at work refers to the languages, if any, that the person uses in their job on a regular basis, other than the language or languages he or she uses most often at work.
- For more information on language variables, including information on their classifications, the questions from which they are derived, data quality and their comparability with other sources of data, please refer to the Languages Reference Guide, Census of Population, 2016.
- 144 The census assumes that the commute to work originates from the usual place of residence, but this may not always be the case. Sometimes, respondents may be on a business trip and may have reported their place of work or main mode of commuting based on where they were working during the trip. Some persons maintain a residence close to work and commute to their home on weekends. Students often work after school at a location near their school. As a result, the data may show unusual commutes or unusual main modes of commuting.
- 145 Refers to the length of time, in minutes, usually required by a person to travel between his or her place of residence and his or her place of work.
- 146 Refers to the time of day at which a person usually leaves home to go to their place of work.
- 147 Refers to the status of a person with regard to the place of residence on the reference day, May 10, 2016, in relation to the place of residence on the same date one year earlier at the provincial level. Persons who have not moved are referred to as non-movers and persons who have moved from one residence to another are referred to as movers. Movers include non-migrants and migrants. Non-migrants are persons who did move but remained in the same city, town, township, village or Indian reserve. Migrants include internal migrants, who moved to a different city, town, township, village or Indian reserve within Canada. External migrants include persons who lived outside Canada at the earlier reference date.
- 148 Refers to the status of a person with regard to the place of residence on the reference day, May 10, 2016, in relation to the place of residence on the same date five years earlier at the provincial level. Persons who have not moved are referred to as non-movers and persons who have moved from one residence to another are referred to as movers. Movers include non-migrants and migrants. Non-migrants are persons who did move but remained in the same city, town, township, village or Indian reserve. Migrants include internal migrants, who moved to a different city, town, township, village or Indian reserve within Canada. External migrants include persons who lived outside Canada at the earlier reference date.
