## Symbol(s)

- .. not available for a specific reference period
- ... not applicable
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- F too unreliable to be published

## Footnote(s)

1 Users should be aware that the estimates associated with this variable are more affected than most by the incomplete enumeration of certain Indian reserves and Indian settlements in the Census of Population.

For more information on Aboriginal variables, including information on their classifications, the questions from which they are derived, data quality and their comparability with other sources of data, please refer to the Aboriginal Peoples Reference Guide, Census of Population, 2016 and the Aboriginal Peoples Technical Report, Census of Population, 2016.

2 Inuit Nunangat is the homeland of the Inuit of Canada. It includes the communities located in the four Inuit regions: Nunatsiavut (Northern coastal Labrador), Nunavik (Northern Quebec), the territory of Nunavut and the Inuvialuit region of the Northwest Territories. These regions collectively encompass the area traditionally occupied by Inuit in Canada.

3 The category 'Total - Single and multiple responses of language spoken at home' indicates the number of respondents who reported each language, either as their only response, or in combination with another language. Total responses represent the sum of single and multiple responses of the language spoken at home received in the census.

4 A single response to the language spoken at home occurs when a respondent provides one language only.

5 A multiple response to the language spoken at home occurs when a respondent provides two or more languages.

6 This is a total population count. The sum of the languages in this table is greater than the total population count because a person may report more than one language in the census.

n.i.e. = not included elsewhere

n.o.s. = not otherwise specified

## Data quality note(s) – Canada

- **Incomplete enumeration flag**

Excludes census data for one or more incompletely enumerated Indian reserves or Indian settlements.

- **Long-form data quality flag**

Global non-response rate (GNR), long-form census questionnaire: 5.1%.

- **Long-form income data quality flag**

Default. Data quality index showing a long-form income non-response rate lower than 10%.
