E : use with caution

F : too unreliable to be published.

Footnotes:

¹ Source: Aboriginal Peoples Survey 2012.

² Access to and use of health care services includes four components: regular medical doctor status, contact with health professional in the last 12 months, contact with dental professional in the last 12 months, and health care required in the last 12 months but not received.

³ The Inuit population includes persons who reported being 'Inuk (Inuit)' in the Aboriginal Peoples Survey either as their only Aboriginal identity or as part of a multiple identity including 'Inuk (Inuit)' and 'First Nations' and/or 'Métis'.

- 4 Inuit Nunangat is the homeland of Inuit of Canada. It includes communities in Nunatsiavut (Northern coastal Labrador), Nunavik (Northern Quebec), the territory of Nunavut and the Inuvialuit region (Northwest Territories). These regions collectively encompass the area traditionally occupied by Inuit in Canada.
- 5 Bootstrapping techniques were used to produce the coefficient of variation (CV).
- 6 Data with a coefficient of variation (CV) from 16.6% to 33.3% are identified by an (E) and should be interpreted with caution.
- 7 Data with a coefficient of variation (CV) greater than 33.3% were suppressed (F) due to extreme sampling variability.
- 8 Proxy reporting was used in the 2012 Aboriginal Peoples Survey for most children aged 6 to 14 years, nearly half of youth aged 15 to 17 years and for adults in certain specific situations (for example when the selected adult was not able to answer for health related reasons, due to a language barrier, or because the selected respondent was going to be away from home for the duration of the survey.)
- 9 Respondents were asked: 'Do you have a regular medical doctor?'
- 10 All percentages for the component 'regular medical doctor status' are calculated using the number of persons in 'total, regular medical doctor status' as denominator.
- 11 Respondents who said that they did not have a regular medical doctor were asked the following question: 'Why do you not have a regular medical doctor?', followed by a list of prespecified reasons. Note: a person may have reported more than one reason for not having a regular medical doctor.
- 12 Other reason(s) may include: person had a medical doctor who left or retired, or other unspecified reason.
- 13 'Not specified' categories consist of item non-response ('Refusal', 'Don't know', and 'Not stated').
- 14 Respondents were asked: 'Not counting if you were an overnight patient, in the past 12 months, have you seen or talked to any of the following health professionals about your physical, emotional or mental health? (Do not include overnight stays in hospitals, nursing homes or convalescent homes.)'. They were then provided with a list of health professionals to which they could answer 'Yes' or 'No' regarding having contact in the last 12 months. Note: a person may have reported contacting more than one health professional in the last 12 months.
- 15 All percentages for the component 'contact with health professional in the last 12 months' are calculated using the number of persons in 'total, contact with health professional in the last 12 months' as denominator.
- 16 'Contact' includes both face-to-face and telephone contact with health professionals.
- 17 Dental professionals are not included among the health professionals mentioned in the list. Questions on contact with a dental professional were asked separately.
- 18 Other medical doctors or specialists may include: surgeons, allergists, orthopedists, urologists, gynecologists, psychiatrists, or other unspecified health professionals.
- 19 Respondents were asked: 'When was the last time that you saw a dental professional?' followed by a list of pre-specified time period response categories, including the response 'Never'.
- 20 All percentages for the component 'contact with dental professional in the last three years' are calculated using the number of persons in 'total, contact with dental professional in the last three years' as denominator.
- 21 'Contact with dental professional in the last three years' includes only face-to-face visits, within the last three years but not exactly three years ago.
- 22 Includes persons who had last contacted a dental professional exactly three years ago or more than three years ago, and persons who had never contacted a dental professional.
- 23 Respondents were asked: 'During the past 12 months, was there ever a time when you felt that you needed health care but you didn't receive it?'
- 24 All percentages for the component 'health care required in the last 12 months but not received' are calculated using the number of persons in 'total, health care required in the last 12 months but not received' as denominator.
- 25 Health care in this component may include dental care, depending on the respondent's interpretation of the question.
