

MEDIAN INCOME IN THE PAST 12 MONTHS (IN 2017 INFLATION-ADJUSTED DOLLARS)
2017 American Community Survey 1-Year Estimates

Note: This is a modified view of the original table.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Technical Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Versions of this table are available for the following years:

2005

Subject	Alaska			
	Percent Distribution		Median income (dollars)	
	Estimate	Margin of Error	Estimate	Margin of Error
Households	250,741	+/-3,074	73,181	+/-2,628
One race--				
White	72.5%	+/-1.0	81,067	+/-2,238
Black or African American	2.8%	+/-0.4	61,879	+/-16,176
American Indian and Alaska Native	11.9%	+/-0.8	48,920	+/-1,906
Asian	4.7%	+/-0.4	68,679	+/-6,825
Native Hawaiian and Other Pacific Islander	N	N	63,912	+/-34,486
Some other race	N	N	70,667	+/-19,174
Two or more races	5.5%	+/-0.7	70,678	+/-8,679
Hispanic or Latino origin (of any race)	6.0%	+/-0.5	63,954	+/-7,966
White alone, not Hispanic or Latino	69.2%	+/-0.9	81,838	+/-2,518
HOUSEHOLD INCOME BY AGE OF HOUSEHOLDER				
15 to 24 years	4.4%	+/-0.7	39,990	+/-5,541
25 to 44 years	37.7%	+/-1.0	73,354	+/-5,635
45 to 64 years	38.3%	+/-1.0	86,421	+/-4,040
65 years and over	19.5%	+/-0.6	59,877	+/-3,049
FAMILIES				
Families	167,401	+/-3,753	86,831	+/-2,820
With own children of householder under 18 years	47.9%	+/-1.5	79,352	+/-4,879
With no own children of householder under 18 years	52.1%	+/-1.5	93,830	+/-3,264
Married-couple families	74.0%	+/-1.6	101,562	+/-2,545
With own children under 18 years	33.1%	+/-1.6	100,499	+/-5,023
Female householder, no husband present	17.1%	+/-1.3	48,332	+/-7,359
With own children under 18 years	9.9%	+/-1.2	35,232	+/-6,312
Male householder, no wife present	9.0%	+/-1.1	63,172	+/-6,235
With own children under 18 years	4.9%	+/-0.8	53,554	+/-9,761
FAMILY INCOME BY FAMILY SIZE				
2-person families	(X)	(X)	80,474	+/-5,111
3-person families	(X)	(X)	81,427	+/-6,183
4-person families	(X)	(X)	97,465	+/-9,938
5-person families	(X)	(X)	96,709	+/-9,064
6-person families	(X)	(X)	102,158	+/-8,410
7-or-more person families	(X)	(X)	81,544	+/-10,573
FAMILY INCOME BY NUMBER OF EARNERS				
No earners	10.1%	+/-1.1	45,100	+/-5,512
1 earner	34.0%	+/-1.9	61,539	+/-3,506
2 earners	45.5%	+/-1.9	105,784	+/-3,811
3 or more earners	10.4%	+/-1.1	126,050	+/-11,807
NONFAMILY HOUSEHOLDS				
Nonfamily households	83,340	+/-3,526	48,441	+/-2,656
Female householder	44.1%	+/-1.9	44,709	+/-5,368
Living alone	34.6%	+/-2.0	37,375	+/-5,088
Not living alone	9.5%	+/-1.4	87,087	+/-19,715
Male householder	55.9%	+/-1.9	50,176	+/-2,503
Living alone	41.6%	+/-2.5	44,985	+/-3,972
Not living alone	14.3%	+/-1.9	78,089	+/-13,665

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An 'L' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An 'L' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An 'U' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

When information is missing or inconsistent, the Census Bureau logically assigns an acceptable value using the response to a related question or questions. If a logical assignment is not possible, data are filled using a statistical process called allocation, which uses a similar individual or household to provide a donor value. The "Allocated" section is the number of respondents who received an allocated value for a particular subject.

While the 2017 American Community Survey (ACS) data generally reflect the July 2015 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
