SEX BY AGE BY DISABILITY STATUS
Universe: Civilian noninstitutionalized population
2017 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

	Alaska	
	Estimate	Margin of Error
Total:	716,178	+/-2,175
Male:	366,114	+/-3,066
Under 5 years:	26,064	+/-1,147
With a disability	166	+/-129
No disability	25,898	+/-1,142
5 to 17 years:	67,704	+/-1,506
With a disability	3,828	+/-973
No disability	63,876	+/-1,705
18 to 34 years:	90,812	+/-2,297
With a disability	8,206	+/-1,642
No disability	82,606	+/-2,448
35 to 64 years:	140,572	+/-1,986
With a disability	21,645	+/-2,095
No disability	118,927	+/-2,738
65 to 74 years:	29,319	+/-854
With a disability	9,458	+/-1,316
No disability	19,861	+/-1,352
75 years and over:	11,643	+/-556
With a disability	6,684	+/-800
No disability	4,959	+/-794
Female:	350,064	+/-2,412
Under 5 years:	26,853	+/-1,277
With a disability	334	+/-307
No disability	26,519	+/-1,268
5 to 17 years:	64,201	+/-1,491
With a disability	1,427	+/-695
No disability	62,774	+/-1,649
18 to 34 years:	84,410	+/-1,463
With a disability	5,671	+/-1,272
No disability	78,739	+/-1,548
35 to 64 years:	134,050	+/-1,486
With a disability	17,565	+/-2,397
No disability	116,485	+/-2,868
65 to 74 years:	27,107	+/-802
With a disability	7,985	+/-1,063
No disability	19,122	+/-1,193
75 years and over:	13,443	+/-590
With a disability	7,429	+/-922
No disability	6,014	+/-830

Explanation of Symbols:
An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2017 American Community Survey (ACS) data generally reflect the July 2015 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
