Universe: Civilian noninstitutionalized population
2017 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Technical Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Versions of this table are available for the following years:

2017
[2016](#)
[2015](#)
[2014](#)
[2013](#)
[2012](#)
[2011](#)
[2010](#)
[2009](#)
[2008](#)

		Alaska	
		Estimate	Margin of Error
1	Total:	716,178	+/-2,175
39	Male:	366,114	+/-3,066
of	Under 5 years:	26,064	+/-1,147
39	With a vision difficulty	83	+/-113
	No vision difficulty	25,981	+/-1,133
	5 to 17 years:	67,704	+/-1,506
	With a vision difficulty	853	+/-404
	No vision difficulty	66,851	+/-1,557
	18 to 34 years:	90,812	+/-2,297
	With a vision difficulty	1,409	+/-757
	No vision difficulty	89,403	+/-2,460
	35 to 64 years:	140,572	+/-1,986
	With a vision difficulty	4,024	+/-1,058
	No vision difficulty	136,548	+/-2,227
	65 to 74 years:	29,319	+/-854
	With a vision difficulty	1,250	+/-398
	No vision difficulty	28,069	+/-963
	75 years and over:	11,643	+/-556
	With a vision difficulty	1,258	+/-389
	No vision difficulty	10,385	+/-629
	Female:	350,064	+/-2,412
	Under 5 years:	26,853	+/-1,277
	With a vision difficulty	329	+/-305
	No vision difficulty	26,524	+/-1,268
	5 to 17 years:	64,201	+/-1,491
	With a vision difficulty	282	+/-210
	No vision difficulty	63,919	+/-1,515
	18 to 34 years:	84,410	+/-1,463
	With a vision difficulty	1,691	+/-718
	No vision difficulty	82,719	+/-1,568
	35 to 64 years:	134,050	+/-1,486
	With a vision difficulty	4,278	+/-1,144
	No vision difficulty	129,772	+/-1,856
	65 to 74 years:	27,107	+/-802
	With a vision difficulty	1,645	+/-639
	No vision difficulty	25,462	+/-1,052
	75 years and over:	13,443	+/-590
	With a vision difficulty	1,906	+/-622
	No vision difficulty	11,537	+/-779

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the [Evaluation Report Covering Disability](#).

While the 2017 American Community Survey (ACS) data generally reflect the July 2015 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
