

TENURE BY HOUSEHOLD TYPE (INCLUDING LIVING ALONE) AND AGE OF HOUSEHOLDER

Universe: Occupied housing units

2017 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Technical Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

	Alaska	
	Estimate	Margin of Error
Total:	250,741	+/-3,074
Owner occupied:	159,344	+/-3,559
Family households:	117,230	+/-3,386
Married-couple family:	93,968	+/-3,365
Householder 15 to 34 years	11,211	+/-1,762
Householder 35 to 64 years	61,659	+/-2,700
Householder 65 years and over	21,098	+/-1,488
Other family:	23,262	+/-1,957
Male householder, no wife present:	8,823	+/-1,292
Householder 15 to 34 years	979	+/-368
Householder 35 to 64 years	6,079	+/-1,051
Householder 65 years and over	1,765	+/-597
Female householder, no husband present:	14,439	+/-1,635
Householder 15 to 34 years	1,564	+/-622
Householder 35 to 64 years	9,956	+/-1,404
Householder 65 years and over	2,919	+/-508
Nonfamily households:	42,114	+/-3,077
Householder living alone:	35,018	+/-2,886
Householder 15 to 34 years	2,376	+/-757
Householder 35 to 64 years	20,187	+/-2,239
Householder 65 years and over	12,455	+/-1,505
Householder not living alone:	7,096	+/-1,214
Householder 15 to 34 years	1,527	+/-539
Householder 35 to 64 years	4,173	+/-988
Householder 65 years and over	1,396	+/-478
Renter occupied:	91,397	+/-3,639
Family households:	50,171	+/-2,887
Married-couple family:	29,857	+/-2,579
Householder 15 to 34 years	14,734	+/-1,961
Householder 35 to 64 years	13,648	+/-1,853
Householder 65 years and over	1,475	+/-532
Other family:	20,314	+/-2,059
Male householder, no wife present:	6,179	+/-1,257
Householder 15 to 34 years	3,021	+/-1,106
Householder 35 to 64 years	2,900	+/-793
Householder 65 years and over	258	+/-167
Female householder, no husband present:	14,135	+/-1,746
Householder 15 to 34 years	6,520	+/-1,179
Householder 35 to 64 years	7,053	+/-1,482
Householder 65 years and over	562	+/-378
Nonfamily households:	41,226	+/-3,121
Householder living alone:	28,486	+/-2,750
Householder 15 to 34 years	8,634	+/-1,885
Householder 35 to 64 years	13,400	+/-1,708
Householder 65 years and over	6,452	+/-1,066
Householder not living alone:	12,740	+/-1,738
Householder 15 to 34 years	7,785	+/-1,261
Householder 35 to 64 years	4,396	+/-1,099
Householder 65 years and over	559	+/-307

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2017 American Community Survey (ACS) data generally reflect the July 2015 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
